A NEWSLETTER FOR JAVITS CENTER CUSTOMERS

Improving Our Infrastructure

December 2019

To prepare for the new year ahead, the Javits Center's Facilities Department will be implementing a number of infrastructure improvements to enhance the experience for our customers, business partners and employees. Some highlights include:

- **Fire Safety System Testing:** In conjunction with Siemens, the building's fire safety system will be tested and updated in all required areas;
- **New Water Fountains:** All water fountains in public spaces on Levels 1 and 3 will be updated with an option for filling a water bottle. These 2-in-1 machines are designed to improve water fountain lines during high traffic times; and
- **Carpet Cleaning:** All carpets throughout the convention center will be extracted and deep cleaned in order to provide visitors with an optimal experience in 2020.
