A NEWSLETTER FOR JAVITS CENTER CUSTOMERS

## Infrastructure Improvements

April 2019

In recent weeks, the Javits Center's Facilities Department has made numerous improvements to the convention center's infrastructure, all designed to continue to enhance the experience for our customers and employees. Some of the latest efforts include:

- **New Charging Stations:** Installation of more than 30 charging stations in the North and South 2D corridors, providing customers an opportunity to sit, relax and recharge during their events and in-between meetings.
- **Loading Dock Painting:** Painting the ceiling of the first and third floors of the loading docks to refresh the bustling area. Customers will notice a new dark blue color thanks to our team of painters who sought to make the area more appealing.
- **Installation of the West 34th Street gates:** These new fully automated gates on West 34th Street near 12th Avenue will provide necessary egress for trucks using loading docks at the first and third levels of the Javits Center. These modernized gates are designed to increase security while

allowing operational access as needed.
