New Par-Can Lighting

June 2016

The Javits Center has added energy-saving LED par-can lights to our list of equipment offerings. Our new LED par-cans provide a cool, white light with 1,000 watts of illumination – without the heat emitted by incandescent par-cans.

In compliance with NYS Executive Order 88 – a mandate to improve energy efficiency – we have replaced the older par-can with the new LED par-can lights (see specifications below). In addition, exhibitors will benefit from the cost savings by an average of \$73.00 per fixture.

LED Par-can Specifications:

- Rates: \$395.65 for the Advance Rate (\$73.75 in savings) and \$494.56 for the Standard Rate (\$148.24 in savings)
- Slim design for a more attractive look
- Energy efficient
- 12-foot illumination spread
- Bright lighting without the heat for comfort
- 4000K/10220 nominal lumen output
- Installation/dismantle included

If you have any questions, please call Exhibitor Solutions at 877-452-8487.
